

Annual Model Competition 2025

Coaching and NPC Stock

The following pages show the entries in the Coaching stock category of the 2025 model competition. Voting takes place online, and all members will be emailed voting instructions and a unique voting ID.

To make your choice, look through the pages, and select your choice of best entry, note its number (eg. C2) and select that choice on the online voting form.

Photograph copyright is held by the individual entrants to the competition.

C1 – Highland Railway six-wheel coaches, two each of three Jones designs built around 1890 (all third; luggage composite; full brake). Five are finished in the later plain green Drummond livery, with one in the original green and white, and all use the Association transfers. The coaches have home 3D-printed bodies drawn up in Fusion 360 and printed in ABS-like resin, along with my own etched underframes (Association wheels) and Electra couplings. The only separate additions to the bodies are wire handrails. Other adornments such as end steps, door handles and oil lamp holders are printed integral with the bodies, as are the buffers.

C2 – Farish Mk 1s. Wheels converted to 2mm by turning down. Detail applied to the end of the BG. Weathering applied using pastels fixed with Dulcote. The inspiration for the short cross-country passenger train was taken from an Ian Allen Loco Spotters Club Annual from 1966.
